

الأبحاث المتقدمة	م
A linear Programming Method for Solving Rough Interval Transportation Problem <b>El-sherbiny.M.M.N</b>	<b>1</b>
A Hybrid Approach for Solving Course Timetable Problem <b>Mahmoud M. El-sherbiny, Ramadan A.ZeinEldin and Abdalla M.El-Dhshan</b>	<b>2</b>
An Interval Transportation Problem With N-Vehicle <b>El-sherbiny. M.M.N, Ramadan A.ZeinEldin</b>	<b>3</b>
Optimizing the Parameters of an Artificial Immune System Algorithm for Solving the Assembly Line Balancing Problem <b>Mahmoud M. El-sherbiny</b>	<b>4</b>
Optimizing Type II error Under Crisp and Fuzzy Environment <b>Naglaa A.Mourad</b>	<b>5</b>
Tuning The Parameters of Modified Artificial Bee Colony Algorithm for Solving the Container Loading Problem <b>Ramadan A.ZeinEldin, Mahmoud M. El-sherbiny</b>	<b>6</b>
Environmental Economics and Feasibility Studies using MCDM for Petroleum and Gas Projects <b>El-Sherbiny</b>	<b>7</b>
